

Phazzer Stun Gun Series User Manual

PHAZZER TITAN

Warnings

If your model has a safety disconnect rip cord, the unit WILL NOT activate unless the pin is installed into the hole in the bottom of the unit. ALWAYS WEAR RIP CORD AROUND YOUR WRIST SO THAT IF YOU ARE DISARMED, THE UNIT CANNOT BE USED AGAINST YOU. DO NOT DISCHARGE THE STUN GUN INTO THE AIR FOR MORE THAN TWO SECONDS AT A TIME. REPEAT FIRING INTO THE AIR FOR LONGER THAN TWO SECONDS CAN DAMAGE THE UNIT AND VOID THE WARRANTY. PLEASE DO NOT OPEN THE CASE THIS WILL VOID THE WARRANTY.

Operating the Unit

The Phazzer Titan unit uses a high-frequency oscillating circuit to enhance current output; this high-capacity direct current makes this units' current output five times stronger than conventional electronic pulse stun guns. The Titan unit has a safety disconnect rip cord, so make sure the safety switch is in the OFF position before inserting it into the hole at the bottom of the unit. Then slide the safety switch at the bottom of the unit to the ON position. Once activated, a green light will appear. Then you can switch the unit between Stun Mode, Alarm Mode and Light Mode. Make sure that no part of your hand or body is close to the contact probes during Stun Mode as it may result in you receiving a shock. You will see and hear an electrical discharge between the two electrodes when pressing the red trigger button in Stun Mode. In order to activate the blinding L.E.D. light, slide the power switch to light mode and point it directly into the eyes of the assailant. This will cause a temporary blindness of 5 to 8 seconds. If the assailant continues to pursue you, touch the assailant with the outside metal contact probes while pressing the red discharge button and having the safety switch in the engage or Stun Mode position. The current will penetrate up to one full inch of clothing and does not have to touch the skin in order to be effective. You can touch any part of the assailant's body, although the major muscle groups, neck, torso and groin are your primary targets in order to drop the assailant. A 1/2 second touch will startle and repel assailants. This will give the assailant some pain and muscle contractions. A moderate length touch of 2 to 4 seconds can cause the assailant to fall to the ground and result in some mental confusion as well as disorientation. No sound will be heard when touching the target with the stun gun. Under no conditions can the charge be transferred into your body, even if the assailant is holding on to you. The unit cannot be damaged by continued firing into the body of the target. When in Alarm mode the unit will sound an ear piercing 110 decibel alarm. This alarm will also sound if the user is disarmed and the circuit disconnect rip cord has been removed; however the stun feature will not activate and thus cannot be used against the user.

Battery Information

The Phazzer Titan stun gun uses two high quality, 3v, NiMH rechargeable batteries for a total of 6v and should work immediately out of the box, but it is a good idea to have a full charge of at least 12 hours, but no longer than 16 hours on the first charge. DO NOT overcharge the battery; this will shorten the battery's life. Once the battery charging indicator light turns RED, immediately remove unit from the wall outlet. A fully charged battery should hold a charge for 1 to 2 months depending on how often the stun features, alarm and light are used. The best way to keep the battery fully charged is to charge the battery once a month for 1 to 3 hours and to keep the unit in the off position when not in use. This should keep the battery fully charged. But remember DO NOT OVERCHARGE THE BATTERY because this will shorten the battery's life. Under normal conditions, the battery can be charged up to 500 times.

Limited Warranty & Safety

This product has a 1 year warranty from the date of original purchase. Warranty does not include rechargeable battery packs. Manufacturer warrants this product to be free from defective material or factory workmanship and agrees to repair or replace such products, which under normal use and service become defective. Our obligation under this warranty is limited to repairing, replacing or substituting the defective unit for a newer model of equal value. Purchaser must retain a copy of the purchase receipt and return the defective unit in order to obtain warranty service or replacement. This device is only allowed to be carried by persons 18 years of age or older. Purchaser agrees to use the stun gun in a lawful manner for self defense. Purchaser also agrees to hold harmless the importer, distributor, and retailer for any misuse of this product. Check local and state regulations to determine if possession of this device is legal in the jurisdiction the unit is being carried. Keep away from Children and flammable materials due to the spark being a means of combustion. Always remove the circuit disconnect rip cord when there are children present and the unit is not in use as this will completely deactivate the unit and prevent its' operation even if the unit is turned to the on position.
